

MY ROLE AT THE CONFERENCE

The conference seeks to exchange knowledge and social and public policy experiences in order to define principles, guiding actions and follow-up mechanisms for the transformation of agrifood systems.

As characteristics of the event, it is focused on horizontal dialogue rather than continuous expositions. The participants will contribute to the debate at the discussion tables of the 7 axes. Your role in the dialogue tables of the axes during the conference will be to contribute to the debate in order to formulate a declaration of the axis based on a guiding document. The contribution will focus on three central points: guiding principles, substantive actions and defining the follow-up mechanism to achieve the transformation of agri-food systems.

We are foreseeing an alternative space for several people to share their experiences and dialogue with other realities.
